Preface	V
----------------------	---

Part I Economic modelling and financial markets

Agent-based models of economic interactions <i>Anirban Chakraborti and Guido Germano</i>	3
--	---

On kinetic asset exchange models and beyond: microeconomic formulation, trade network, and all that <i>Arnab Chatterjee</i>	31
---	----

Microscopic and kinetic models in financial markets <i>Stephane Cordier, Dario Maldarella, Lorenzo Pareschi, and Cyrille Piatecki</i>	51
---	----

A mathematical theory for wealth distribution <i>Bertram Düring and Daniel Matthes</i>	81
--	----

Tolstoy's dream and the quest for statistical equilibrium in economics and the social sciences <i>Ubaldo Garibaldi and Enrico Scalas</i>	115
--	-----

Part II Social modelling and opinion formation

New perspectives in the equilibrium statistical mechanics approach to social and economic sciences <i>Elena Agliari, Adriano Barra, Raffaella Burioni, and Pierluigi Contucci</i>	137
---	-----

Kinetic modelling of complex socio-economic systems <i>Giulia Ajmone Marsan</i>	175
---	-----

Mathematics and physics applications in sociodynamics simulation: the case of opinion formation and diffusion <i>Giacomo Aletti, Ahmad K. Naimzada, and Giovanni Naldi</i>	203
Global dynamics in adaptive models of collective choice with social influence <i>Gian-Italo Bischi and Ugo Merlone</i>	223
Modelling opinion formation by means of kinetic equations <i>Laurent Boudin and Francesco Salvarani</i>	245
Part III Human behavior and swarming	
On the modelling of vehicular traffic and crowds by kinetic theory of active particles <i>Nicola Bellomo and Abdelghani Bellouquid</i>	273
Particle, kinetic, and hydrodynamic models of swarming <i>José A. Carrillo, Massimo Fornasier, Giuseppe Toscani, and Francesco Vecil</i>	297
Modeling self-organization in pedestrians and animal groups from macroscopic and microscopic viewpoints <i>Emiliano Cristiani, Benedetto Piccoli, and Andrea Tosin</i>	337
Statistical physics and modern human warfare <i>Alex Dixon, Zhenyuan Zhao, Juan Camilo Bohorquez, Russell Denney, and Neil Johnson</i>	365
Diffusive and nondiffusive population models <i>Ansgar Jüngel</i>	397
Index	427
