TABLE OF CONTENTS

Contributors	vii
Acknowledgements	ix
Introduction – EF Torrey, MB Knable	1
Methodology and General Findings	
1. Psychiatric Brain Banks: Situation in Europe and Asia I Matsumoto, SI Niwa, R Ravid	3
2. Methodological and Stereological Considerations in Postmortem Psychiatric Brain Research IP Everall, PJ Harrison	21
3. Imaging vs. Postmortem Receptor Studies: What You See is What You Get? L Pilowsky	37
4. Glial Pathology and Major Psychiatric Disorders DR Cotter, CM Pariante, G Rajkowska	49
5. Indications of Abnormal Connectivity in Neuropsychiatric Disorders in Postmortem Studies WG Honer	75
6. Studies in the Human Frontal Cortex: Evidence for Changes in Neurochemical Markers in Schizophrenia and Bipolar Disorder B Dean	93
7. Summary of Prefrontal Molecular Abnormalities in the Stanley Foundation Neuropathology Consortium MB Knable, BM Barci, MJ Webster, EF Torrey	105
Schizophrenia	
8. Macroanatomical Findings in Postmortem Brain Tissue from Schizophrenic Patients P Falkai	139
9. Microanatomical Findings in Postmortem Brain Tissue from Subjects with Schizophrenia: Disturbances in Thalamocortical and Corticocortical in Schizophrenia T Hashimoto, DA Lewis	151

10. In Situ/Histological Approaches to Neurotransmitter-Specific Postmortem Brain Studies of Schizophrenia SE Bachus, JE Kleinman	173
11. Defining the Role of Specific Limbic Circuitry in the Pathophysiology of Schizophrenia and Bipolar Disorder FM Benes, S Berretta	211
12. Dorsolateral Prefrontal Cortical Parallel Circuit in Schizophrenia: Postmortem Abnormalities BG Bunney, WE Bunney, R Stein, SG Potkin	235
13. Postmortem Studies of the Hippocampal Formation in Schizophrenia AJ Dwork	253
14. GSK-3 and WNT Markers of Neurodevelopmental Abnormalities in Schizophrenia N Kozlovsky, RH Belmaker, G Agam	267

Affective Disorders

15. Macroanatomical Findings in Postmortem Brain Tissue GD Pearlson	277
16. Quantitative Cytoarchitectonic Findings in Postmortem Brain Tissue from Mood Disorder Patients G Rajkowska	291
17. Phosphoinositide Signal Transduction System in Postmortem Human Brain RS Jope	325
18. cAMP Signal Transduction Abnormalities in the Pathophysiology of Mood Disorders: Contributions from Postmortem Brain Studies A Chang, PP Li, JJ Warsh	341
19. Monoamine Receptors in Postmortem Brain: Do Postmortem Brain Studies Cloud or Clarify our Understanding of the Affective Disorders? CA Stockmeier, G Jurjus	363
20. Non-Monoaminergic Transmitters, Glia Cell Markers, Cell Adhesion Molecules and Synaptic Proteins in Postmortem Brain Tissue D Rujescu, P Riederer	387

Concluding Remarks

ACKNOWLEDGEMENTS

This book was conceived during a visit of Ian Everall to Beersheba and Abraham's well, where the Biblical concept of emotion as resident in "heart and kidneys" was examined in the light of brain physiology and molecular biology. The foresight of the founders of the Stanley Foundation Brain Consortium as well as the generosity of its benefactors are deeply appreciated. Without the help of Yehudit Curiel, who edited and proofread, this manuscript could never have been completed.
