
Advances in Science, Technology & Innovation

IEREK Interdisciplinary Series for Sustainable Development

Editorial Board

Anna Laura Pisello, Department of Engineering, University of Perugia, Italy

Dean Hawkes, University of Cambridge, Cambridge, UK

Hocine Bougdah, University for the Creative Arts, Farnham, UK

Federica Rosso, Sapienza University of Rome, Rome, Italy

Hassan Abdalla, University of East London, London, UK

Sofia-Natalia Boemi, Aristotle University of Thessaloniki, Greece

Nabil Mohareb, Faculty of Architecture - Design and Built Environment,
Beirut Arab University, Beirut, Lebanon

Saleh Mesbah Elkaffas, Arab Academy for Science, Technology, Egypt

Emmanuel Bozonnet, University of La Rochelle, La Rochelle, France

Gloria Pignatta, University of Perugia, Italy

Yasser Mahgoub, Qatar University, Qatar

Luciano De Bonis, University of Molise, Italy

Stella Kostopoulou, Regional and Tourism Development, University of Thessaloniki,
Thessaloniki, Greece

Biswajeet Pradhan, Faculty of Engineering and IT, University of Technology Sydney,
Sydney, Australia

Md. Abdul Mannan, Universiti Malaysia Sarawak, Malaysia

Chaham Alalouch, Sultan Qaboos University, Muscat, Oman

Iman O. Gawad, Helwan University, Egypt

Anand Nayyar, Graduate School, Duy Tan University, Da Nang, Vietnam

Series Editor

Mourad Amer, International Experts for Research Enrichment and Knowledge Exchange
(IEREK), Cairo, Egypt

Advances in Science, Technology & Innovation (ASTI) is a series of peer-reviewed books based on important emerging research that redefines the current disciplinary boundaries in science, technology and innovation (STI) in order to develop integrated concepts for sustainable development. It not only discusses the progress made towards securing more resources, allocating smarter solutions, and rebalancing the relationship between nature and people, but also provides in-depth insights from comprehensive research that addresses the **17 sustainable development goals (SDGs)** as set out by the UN for 2030.

The series draws on the best research papers from various IEREK and other international conferences to promote the creation and development of viable solutions for a **sustainable future and a positive societal** transformation with the help of integrated and innovative science-based approaches. Including interdisciplinary contributions, it presents innovative approaches and highlights how they can best support both economic and sustainable development, through better use of data, more effective institutions, and global, local and individual action, for the welfare of all societies.

The series particularly features conceptual and empirical contributions from various interrelated fields of science, technology and innovation, with an emphasis on digital transformation, that focus on providing practical solutions to **ensure food, water and energy security to achieve the SDGs**. It also presents new case studies offering concrete examples of how to resolve sustainable urbanization and environmental issues in different regions of the world.

The series is intended for professionals in research and teaching, consultancies and industry, and government and international organizations. Published in collaboration with IEREK, the Springer ASTI series will acquaint readers with essential new studies in STI for sustainable development.

ASTI series has now been accepted for Scopus (September 2020). All content published in this series will start appearing on the Scopus site in early 2021.

Contents

Forward Osmosis for Sustainable Industrial Growth	1
Mónica Rodríguez-Galán, Francisco M. Baena-Moreno, Fátima Arroyo-Torralvo, and Luis F. Vilches-Arenas	
Current Strategies for the Design of Anti-fouling Ion-Exchange Membranes	13
Le Han	
Aging and Degradation of Ion-Exchange Membranes	27
Le Han	
Recent Trends in Membrane Processes for Water Purification of Brackish Water	39
Muhammad Sarfraz	
High Performance Membrane for Natural Gas Sweetening Plants	59
Imran Ullah Khan, Mohd Hafiz Dzarfan Othman, and Asim Jilani	
Hydrocarbon Separation and Removal Using Membranes	73
Mohammad Arif Budiman Pauzan, Mazlinda Abd Rahman, and Mohd Hafiz Dzarfan Othman	
Advanced Membrane Technology for Textile Wastewater Treatment	91
Mohd Hafiz Dzarfan Othman, Mohd Ridhwan Adam, Roziana Kamaludin, Nurul Jannah Ismail, Mukhlis A. Rahman, and Juhana Jaafar	
Solid Electrolyte Membranes for Low- and High-Temperature Fuel Cells	109
Siti Munira Jamil, Mazlinda Abd Rahman, Hazrul Adzfar Shabri, and Mohd Hafiz Dzarfan Othman	
Shear-Enhanced Filtration (SEF) for the Separation and Concentration of Protein	127
Wenxiang Zhang, Luhui Ding, and Nabil Grimi	
Membrane-Permeation Modeling for Carbon Capture from CO₂-Rich Natural Gas	143
José Luiz de Medeiros, Lara de Oliveira Arinelli, and Ofélia de Queiroz F. Araújo	
Polyhydroxyalkanoates (PHAs) for the Fabrication of Filtration Membranes	177
Pacôme Tomietto, Patrick Loulergue, Lydie Paugam, and Jean-Luc Audic
