

Reviews and critical articles covering the entire field of normal anatomy (cytology, histology, cyto- and histochemistry, electron microscopy, macroscopy, experimental morphology and embryology and comparative anatomy) are published in *Advances in Anatomy, Embryology and Cell Biology*. Papers dealing with anthropology and clinical morphology that aim to encourage co-operation between anatomy and related disciplines will also be accepted. Papers are normally commissioned. Original papers and communications may be submitted and will be considered for publication provided they meet the requirements of a review article and thus fit into the scope of "Advances". English language is preferred, but in exceptional cases French or German papers will be accepted.

It is a fundamental condition that submitted manuscripts have not been and will not simultaneously be submitted or published elsewhere. With the acceptance of a manuscript for publication, the publisher acquires full and exclusive copyright for all languages and countries.

Twenty-five copies of each paper are supplied free of charge.

Manuscripts should be addressed to

Prof. Dr. F. **BECK**, Howard Florey Institute, University of Melbourne, Parkville, 3000 Melbourne, Victoria, Australia

Prof. Dr. B. **CHRIST**, Anatomisches Institut der Universität Freiburg, Abteilung Anatomie II, Albertstr. 17, D-79104 Freiburg, Germany

Prof. Dr. W. **KRIZ**, Anatomisches Institut der Universität Heidelberg, Im Neuenheimer Feld 307, D-69120 Heidelberg, Germany

Prof. Dr. W. **KUMMER**, Institut für Anatomie und Zellbiologie, Universität Gießen, Aulweg 123, D-35385 Gießen, Germany

Prof. Dr. E. **MARANI**, Leiden University, Department of Physiology, Neuroregulation Group, P.O. Box 9604, 2300 RC Leiden, The Netherlands

Prof. Dr. R. **PUTZ**, Anatomische Anstalt der Universität München, Lehrstuhl Anatomie I, Pettenkoferstr. 11, D-80336 München, Germany

Prof. Dr. Dr. h.c. Y. **SANO**, Department of Anatomy, Kyoto Prefectural University of Medicine, Kawaramachi-Hirokoji, 602 Kyoto, Japan

Prof. Dr. Dr. h.c. T. H. **SCHIEBLER**, Anatomisches Institut der Universität, Koellikerstraße 6, D-97070 Würzburg, Germany

Ph. D. Gary C. **SCHOENWOLF**, Department of Neurobiology and Anatomy, University of Utah School of Medicine, 50 N. Medical Drive, Salt Lake City, Utah 84132, USA

Prof. Dr. K. **ZILLES**, Universität Düsseldorf, Medizinische Einrichtungen, C. u. O. Vogt-Institut, Postfach 101007, D-40001 Düsseldorf, Germany

Acknowledgements

Special thanks are due to my mentor *Bernhard Tillmann* as well as *Andreas Thale* and *Ulrich Schaudig* as strength of the ‘**Nasolacrimal Duct Research Group**’.

My grateful thanks are also extended to the following persons named in alphabetical order who contributed to the present investigations

Muhammad Ajub, Monica Berry, Anthony Corfield, Marc Föge, Uta Hallmann, Janka Held-Feindt, Margitta Hinz, Roman Hirt, Werner Hoffmann, Guido Kohla, Jan Lehmann, Steffen Maune, Rolf Mentlein, Reza Parwaresch, Jens Paulsen, Thomas Pufe, Rainer Rochels, Roland Schauer, Jens-Michael Schröder, Philipp Steven.

Moreover, I would like to thank *Frank Lichte, Sonja Reiter, Karin Stengel* and *Regine Worm* for their excellent technical assistance; *Heidi Waluk* and *Heidi Siebke* for photographic work; *Clemens Franke* for the schematic graphs; *Rolf Klawns* for excellent support with the corrosion vascular casts; and *Michael Beall* for editing the English.

These studies were supported by Deutsche Forschungsgemeinschaft grants Pa 738/1-1, Pa 738/1-2 and Pa 738/1-3, programs of the German Research Foundation.

Finally, my particular thanks are meant for the patients who gave permission for their tissues that were removed at surgery to be investigated as well as the persons who dedicated their body to the Institute of Anatomy, Christian-Albrechts-University of Kiel, Germany by testament and thus enabled the present investigations.
