

Notes for contributors

A submission to Applied Probability is considered as a submission to either *Journal of Applied Probability* (JAP) or *Advances in Applied Probability* (AAP). Longer papers are typically published in AAP, but the assignment of papers between the two journals is made by the Executive Editor on an issue-by-issue basis. Short communications and letters specifically relating to papers appearing in either JAP or AAP are published in JAP.

Papers submitted to the Applied Probability journals are considered on the understanding that they have not been published previously and are not under consideration by another publication. Accepted papers will not be published elsewhere without the written permission of the Trust. Submitted papers should be in English. It is the author's responsibility to ensure an acceptable standard of language, and a paper failing to meet this requirement may go back to the author for rewriting before being sent out for review.

Papers should include: (i) a **short abstract** of 4–10 lines giving a non-mathematical description of the subject matter and results; (ii) a list of **keywords** detailing the contents; and (iii) a list of **classifications**, using the 2010 Mathematics Subject Classification scheme (<http://www.ams.org/msc/>). Letters to the Editor need not include these. To assist authors in writing papers in the Applied Probability style, they may use the L^AT_EX class file aptpub.cls, available from <http://www.appliedprobability.org/>. Use of this class file is not a condition of submission, but will considerably increase the speed at which papers are processed.

Papers should be submitted electronically through ScholarOne at <https://mc.manuscriptcentral.com/apjournals>. All submissions will be acknowledged on receipt.

Copyright

The copyright of all published papers is vested in the Applied Probability Trust. When a paper is accepted for publication, the Trust asks the authors to assign copyright by signing a form in which the terms of copyright are listed. Failure to do this promptly may delay or prevent publication.

Authorisation to photocopy items for internal or personal use, or the internal or personal use of specific clients, is granted by the Applied Probability Trust for libraries and other users registered with the Copyright Clearance Center (CCC) Transactional Reporting Service, provided that the corresponding processing and royalty fees (see <http://www.copyright.com>) are paid directly to CCC, 222 Rosewood Drive, Danvers, MA 01923, USA. 0021–9002/19

Research Papers

- 703 ANDREA OTTOLINI. Oscillations for order statistics of some discrete processes
- 720 SERIK SAGITOV. Perron–Frobenius theory for kernels and Crump–Mode–Jagers processes with macro-individuals
- 734 CLAUDE LEFÈVRE, PHILIPPE PICARD AND SERGEY UTEV. On branching models with alarm triggerings
- 760 CLAUDIA KLÜPPELBERG AND MIRIAM ISABEL SEIFERT. Explicit results on conditional distributions of generalized exponential mixtures
- 775 DAVID DEREUDRE AND THIBAUT VASSEUR. Existence of Gibbs point processes with stable infinite range interaction
- 792 DAVID F. ANDERSON, DANIELE CAPPELLETTI AND JINSU KIM. Stochastically modeled weakly reversible reaction networks with a single linkage class
- 811 PETER BRAUNSTEINS AND SOPHIE HAUTPHENNE. The probabilities of extinction in a branching random walk on a strip
- 832 LU LI, QINYU WU AND TIAN TIAN MAO. Stochastic comparisons of largest-order statistics for proportional reversed hazard rate model and applications
- 853 ANTAR BANDYOPADHYAY, SVANTE JANSON AND DEBLEENA THACKER. Strong convergence of infinite color balanced urns under uniform ergodicity
- 866 Y. X. MU AND Y. ZHANG. On some threshold-one attractive interacting particle systems on homogeneous trees
- 899 MAHDI TAVANGAR. On the behavior of the failure rate and reversed failure rate in engineering systems
- 911 MERRITT R. LYON AND HOSAM M. MAHMOUD. Trees grown under young-age preferential attachment
- 928 VIKTORBENEŠ, CHRISTOPH HOFER-TEMMELE, GÜNTER LAST AND JAKUB VEČEŘA. Decorrelation of a class of Gibbs particle processes and asymptotic properties of U -statistics
- 956 THOMAS MOUNTFORD AND JACQUES SALIBA. Flooding and diameter in general weighted random graphs
- 981 DAVID HOBSON AND MATTHEW ZENG. Randomised rules for stopping problems
- 1005 QINGWEI LIU AND AIHUA XIA. On moderate deviations in poisson approximation
